

Shree Chamunda Enterprise manufacturer of “**DIAMOND**” All metal reed. A name to reckon with in this industry.

It all began with humble beginning about 40 years ago, when this industry was in its decent phase of life. Sensing the opportunity of everincreasing number of textile industries in around Ahmedabad.

Shree Chamunda Enterprise established by our Global visionary director Shri Lalbhai K. Panchal. Since then, we have never looked back and infact have grown manifolds up to still moments. Since last decade or so, our products “**DIAMOND**” - brands All metal reed is recognized by national & international textile weaving industries as a leading quality manufacturer & exporter of weaving reeds.

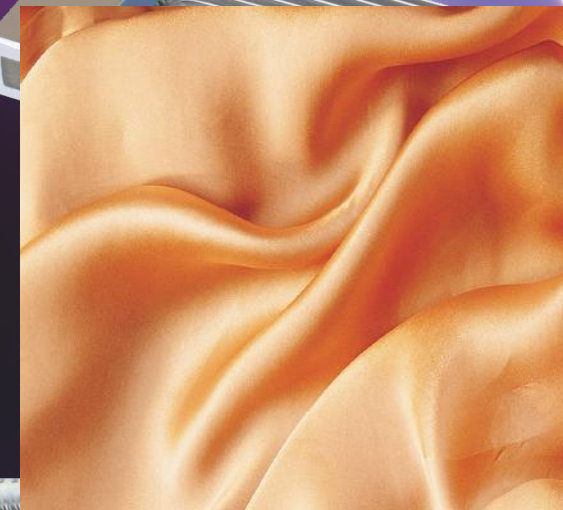

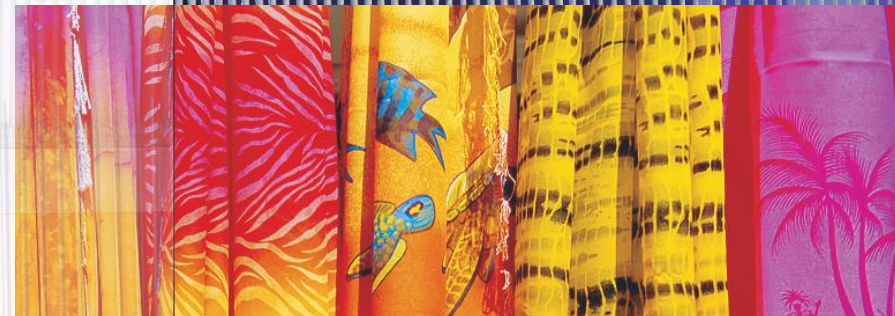

It has been possible due to stringent quality norms, followed at each step of manufacturing processes, best sales after services commitments to more over 1000 customers spread out across the globe and a highly motivated work force. Of course, our customers, who have shown undaunting faith in us.

The company is all set to take giant lead forwards in this business under the guidance by engineers & technician of technocrat founder director Shri Lalbhai K. Panchal and look forward to your continued support to develop ultimate weaving concept.

One Stop For All Kind Weaving Reeds

 **DIAMOND**
ALL METAL REED

Technical Force ⁱⁿ Complete Range

Count (Density)	upto 200s (100 DPI or 39 DP cm)
Reed Dent Width (Dent Broadness)	14 guage (2mm), 13 guage (2.3mm) 11 guage (3mm), 8 guage (4mm), 4 guage (6mm)
Reed Dent Material	Low Carbon Mild Steel Stainless Steel ASI 430 grade High Carbon Steel, Brass
Total Reed Height	64mm to 400mm (2 1/2" to 17 3/4")
Length	Up to above 4 mtrs. (Up to above 13 feet)
Top & Bottom Baulk	Profile Top & Bottom Aluminum Alloy Baulk Thickness 5mm to 11.5 mm Height 8mm to 30mm
Bonding Construction	Epoxy (Resin)
Air Space	As per standard for yarn or as per customer requirement
Type of Looms or Weaving Machines	Hand Loom, Power Loom, Over Peak Loom, Laxmi Loom, Ruti-C loose Loom, Suzler Loom, Picanol GTX Loom, Picanol GAMA Loom, Somet Loom, Back Reed for warping machine, Half Reed, Sizing comb, Under Peak Looms, Cimmco Loom, Ruti-B Loom, Ruti-C Fast Loom, Rapier Loom, Picanol GAMEX Loom, Dornier Loom, Vamatex Loom, V-shape Comb, Flat Reeds, Double Dented reed for Terry Fabric, Tape Reeds for narrow Fabric Looms. Specially manufactured as per customer design also made.
Type of Yarns	All kind of Yarns
Type of Fabrics	Cotton, Silk, Denim, Canvas, Carpet, Jute, Industrial Fabrics, Knitting, Narrow, Bolting

Make your Deal Best

- A one stop source for all your requirements in reeds.
- Customer friendly attitude.
- Exclusive economical price range.
- Prompt delivery schedules.
- Complete infrastructure to fulfill your requirements.
- Believe in long term relationship.

Advantages of Our Reeds

- Production with fix binding system resulting in maximum count/density precision and consistency.
- High quality aluminum alloy baulks results higher strength and leveling of reed.
- High quality epoxy construction results in higher dent gripping.
- High quality reed dent with stand against wear-out resistance excellent beat up resistance and excellent resistance against corrosion.
- Good wear resistance against weaving friction or abrasive yarn.
- Excellent structural plasticity with adequate ductility for vibration stress.
- Smooth round edges dent protects yarn from filiation. Super polish treatment for smooth and trouble free weaving.
- Maximum mechanical precision reducing the shuttle / rapier / gripper abrasion.
- Ideal for slow speed as well as high speed machines.
- Longer Life.
- Stainless steel dent reeds ideal for working in humid surrounding.
- Stainless steel dent reed ideal to avoid dirt on fabrics caused by oxidated or rusted reeds.
